---

## Summary

Cybersecurity enthusiast transitioning from a full-stack development background, with hands-on experience in security, application development, and incident response. Currently pursuing an MSc in Cybersecurity at Nanyang Technological University. Passionate about using advanced cybersecurity tools and techniques to strengthen systems against cyber threats. Proficient in penetration testing, security tool integration, vulnerability assessment, and incident management. Skilled in scripting and automating tasks to improve security workflows.

---

## Skills

- **Cybersecurity Tools:**
    - **Penetration Testing:** Burp Suite, Metasploit, OWASP ZAP, Zeek, Snort, IDA Pro
    - **Network Analysis:** Wireshark, Zeek, Tshark, Capinfos
    - **Security Automation & Scripting:** Bash, Python
    - **Cloud Security:** AWS, Azure, GCP
    - **SIEM & Monitoring:** **ELK Stack** (Elasticsearch, Logstash, Kibana), Grafana, AppDynamics
    - **Security & Forensics:** Autopsy, Incident Response, Forensic Analysis
    - **Threat Intelligence:** Attack Navigator, MITRE ATT&CK Framework
  - **Development & Frameworks:**
    - **Frontend:** React.js, HTML, CSS, JavaScript
    - **Backend:** Node.js, Java, Spring Boot
    - **DevOps:** Docker, Jenkins, Git, Kubernetes, Nginx
    - **Databases:** MySQL
  - **Security Expertise:**
    - Secure Coding Practices, Vulnerability Assessments, Application Security, Encryption, Authentication, Cryptography
- 

## Education

### Master of Science in Cybersecurity (MSCS)

August 2024 – Present |

Nanyang Technological University, Singapore

### Bachelor of Technology in Computer Science Engineering

2018 – 2022 | CGPA: 8.5

SRM Institute of Science and Technology, Chennai

---

## Experience

### Development Bank of Singapore – Application Developer

July 2022 – August 2024

- **Security-Focused Development:** Integrated secure coding practices into front-end and micro frontend development for Internet Banking (IB) and Mobile Banking (MB) applications.
  - **Incident Response & Security Collaboration:** Worked with the Incident Response team to resolve security incidents and improve system resilience, particularly during the Monetary Authority of Singapore (MAS) directive.
  - **Forensics & Vulnerability Assessment:** Participated in forensic analysis and vulnerability assessments to identify and mitigate security risks within banking platforms.
  - **Cross-Functional Collaboration:** Collaborated with backend engineers and security professionals to deliver secure, scalable applications with an emphasis on security compliance.
-

## Projects

- **Research Paper – Lightweight Cryptography for IoT Devices: An Overview** – *Nov 2024*  
Conducted research on lightweight cryptography algorithms like ASCON and PRESENT, exploring their application in IoT environments to enhance energy-efficient security.
- **OAuth and Phishing PoC for Vulnerable Authentication** – *Oct 2024*  
Built a proof-of-concept to demonstrate the vulnerabilities in OAuth authentication. Developed a malicious server to intercept and exploit access tokens.
- **React Application for Encryption** – *Sept 2024*  
Developed a React application implementing AES encryption and RSA key generation using Crypto-JS, focusing on secure data transmission and user authentication.
- **Deep Learning-Based Human and Animal Detection Using OpenCV** – *Jan 2022 – Aug 2022*  
Built a YOLOv3-based deep learning model for real-time surveillance applications, focusing on security-related object detection.

---

## Certifications

- **Application Security Titan - Bronze Level**
- **Front-End Developer – React Language**

---

## Key Achievements

- **Security-First Development:** Implemented secure coding practices in banking applications, reducing vulnerabilities and enhancing security posture.
- **Incident Response Contribution:** Played a pivotal role in responding to critical security incidents during the MAS directive, improving compliance and system resilience.
- **Enhanced Security Compliance:** Collaborated with cross-functional teams to ensure security compliance and best practices in application development.
